Sathiya priya

PYTHON FULLSTACK DEVELOPER

📞 6369532996   ✉ sathiyapriya2920@gmail.com   📍 chennai

ABOUT ME

- Design, develop, and maintain web applications using Python, JavaScript, HTML, and CSS.
- Develop and maintain back-end services and APIs using Python.
- Develop and maintain databases and data storage solutions.
- Develop and maintain automated tests and test suites.

EDUCATION

Graduation

Barathiyar University/PCAS

Bsc,Mathematics

TECHNICAL SKILLS

BACKEND :
- **Python**

FRAMEWORK:
- **Django**

DATABASE:
- **MySql**

FRONTEND:
- **HTML**
- **CSS**

QUERY:
- **React JS**
- **Javascript**

PROJECTS:

CRUD:

I will show you how to build a totally functional CRUD (Create-Read-Update-Delete) application with Django by using one of its most powerful features: the Class-based Views (CBV). That approach maximizes code reuse and allows you to build Django apps much faster and more efficiently.

POLLSTER VOTING SYSTEM:

Django poll application is a full featured polling application. This application Features are the user have to register in this application to show the polls and to vote. If user already voted, he cannot vote again.

ToDo App:

In general, a TODO is written to tell future maintainers about something important: something that should be added, or should be changed, or should not be forgotten. The intention is often to increase the quality of the code. Sometimes a TODO comment can save you a lot of time!

WORD COUNTER APP:

Word Counter is simple web based application made with python and django. This application count every words and presents repetition of each word in a paragraph. Basic python with django framework is used to built this application.

PROJECT TECHNOLOGIES:

Python(Django framework)
HTML
CSS

ACHIEVEMENT:

Rank Holder in U.G(MATHEMATICS)

CERTIFICATION:

Programming in Python fullstack web Development at Uniq Technologies.

STRENGTH:

- Creative Mind
- Quick and Easy Programme solver
- Easy to learn new things
- Team Work,Smart Work

LANGUAGES:

Tamil and English
